As Fresh as the Sea – Automatically

Autoclear is a high performance salt water chlorination system that lets you enjoy crystal clear pool water without the use of harsh chemicals. Autoclear improves your pool water quality by using harmless salt and is a safe, clean, easy alternative to dosing your pool with expensive and messy chlorine granules, tablets or liquid.

AUTOCLEAR FEATURES & BENEFITS

- Computerised automatic control and display system** ✓ Easy to operate and understand.
- Circuit breaker overload protection** ✓ Protection in the event of power surge.
Push button re-set means no expensive and time-consuming repairs.
- Audible & Visual Alarm Systems** ✓ Audible & visual warnings for easy fault identification.
- Solid Plate Electrodes** ✓ Solid plates as standard. Less cleaning required.
- Australia's most efficient and accessible cell** ✓ Unique cell design allows maximum water flow through your filtration system.
- New clear rectangular cell housing** ✓ Unique compact micro cell needs less room to install.
- Automatic overload protection** ✓ Automatic protection for your system if over-salting occurs.
- Automatic low salt warning light** ✓ Warning light flashes if salt level is too low.
- Variable chlorine output control** ✓ Easy adjustment for chlorine production control.
- Australia's Best Warranty** ✓ Warranty support second to none. 2 Year Full Warranty on both power supply and cell. (Plus additional 36 months pro-rata warranty on standard model cells).

As Fresh As The Sea

Autoclear emulates nature's delicate balance by producing chlorine from a mild solution of salt in your pool. In fact, you can only just taste it but it's enough to impart that soft "fresh as the sea feeling" to your pool water.

A Model For Every Pool

The Autoclear system is suitable for domestic and commercial applications. Install it with a brand new pool or spa. Convert your existing pool to automatic salt water chlorination.

Australia's Largest Range

Autoclear is available in Australia's largest range of salt water chlorinators at a price to meet any domestic or commercial pool chlorination requirement.

Low Running Costs

Autoclear costs very little to operate. On average, you'll need to run your Autoclear unit for 6-12 hours per day in Summer, 4-6 hours in Autumn and Spring and 2-4 hours during Winter months.

The Ultimate in Low Maintenance

Models are available with electronic 'Auto Clean' technology which will automatically clean the cell to minimise on-going maintenance. A truly high performance automatic salt chlorinator.

Easy to use and install

An Autoclear system consists of two working components. The electronic cell which connects easily to standard pool plumbing and the wall mounted power pack which controls the operation of the system. When used with a time-clock it automatically chlorinates your pool for the desired period each day.

Guaranteed Performance & Quality

All domestic applications come with a 2 year warranty on power supply and cell. Cell electrodes carry a further 36 months pro-rata warranty on all models. All commercial applications carry a 12 months warranty from date of installation on both power supply and cell electrodes.

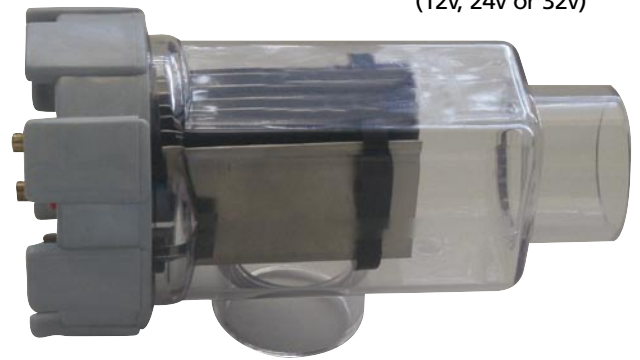

Models Available

STANDARD UNITS
